I would like to add my opposition to petition 04-160 proposed by the National Association of Broadcasters. I am a subscriber to XM satellite radio. I choose this form of communication because it offers me the ability to listen to the widest variety of content; including local information. An individual should not be required to change to a different media type in order to get specific content. Should we be required to turn on the television to learn about local events? No. We should have the freedom to choose the media source (internet, radio, TV, satellite radio). I should not be required to turn off my satellite radio and turn on my FM/AM radio in order to listen to content that is available on either media. People are listening to less FM/AM radio because the content is just not as varied. Before cable TV caught up, people were switching to satellite TV because it had more to offer. The consumer market is advanced by competition. Let satellite radio and FM/AM radio compete without restrictions.
